

Agronomist

Permanent full time

Region: New Liskeard Ontario and area

As an Agronomist you will have to offer advice and information to growers on everything related to farming methods, soil fertilization, production methods, and development of detail recommendation plans as requested. Must develop and implement long term agronomic plans and practices to support farm plans. Maintain industry awareness regarding technical developments. Organize or act as the liaison between our company and farmers to organize the best results from seeding to harvesting outcomes.

QUALITIES AND SKILLS:

- Sound knowledge of Agricultural Science
- A spirit of initiative and problem solving ability
- Ease of communication to be able to clearly submit technical advice to farmers
- Organizational skills to plan crop and seed production operations
- Able to be active member of a team because you will have to collaborate with growers, agricultural technicians and the sales team.

EMPLOYMENT REQUIREMENTS:

- Able to travel within the regions of Abitibi Temiscamingue and New Liskeard
- Good command of English and French would be considered an asset
- Sound knowledge of computer applications
- A Bachelor's degree in agronomy or agricultural science with a minimum of 2 years practical experience.

Closing date: December 7, 2017
