

Agri-Solve Inc. is hiring a full-time Agronomist to join our team! This is a great opportunity to work with different farm operations across Southwestern Ontario. You will provide agronomic advice, knowledge and leadership to growers in their assigned market while performing job duties such as crop planning, field scouting, fertility & soil management.

Responsibilities may include, but are not limited to:

- Create crop plans with customers based on their requirements and current operations including weed management and fertility recommendations.
- Scout customer fields throughout the growing season for weed, insects, disease and nutritional issues.
- Create crop recommendations based upon current field conditions.
- Ensure that application of seeding, fertility and pesticides are improving the customers productivity.
- Document field evaluations of seed, chemical, fertilizer and specialty products.
- Work with customers to achieve goals relating to weed management, yield potential and soil improvement.
- Soil sample fields, which may include multiple depth sampling, sampling by geo-reference and multiple site sampling in the event of changes in soil texture.
- Gather, compile, analyze and interpret test results and prepare progress reports.
- Create farm maps and soil sampling maps.
- Assist with agronomic budgeting and cost monitoring with customers.
- Interact with suppliers, applicators and agronomy laboratories.
- Remain up to date on crop nutrition and protection technology
- Build customer relationships and trust.
- Build lasting relationships with new and current customers to understand their needs.

Requirements:

- College degree in Agronomy or B.Sc Agriculture is a requirement.
- CCA designation or willingness to obtain is a necessity.
- Experience in the agronomy industry with seed, crop protection and fertility is required.
- Familiarity with John Deere Operations Center, Climate Field View, Farm Works & other digital agriculture mapping, and script producing software is an asset.
- Valid Driver's License and a fairly clean abstract.
- Ability to clearly communicate observations and recommendations.
- Great penmanship and ability to read and write cursive, or willingness to obtain, is a must.
- Demonstrate initiative to work independently but being able to work with team members and customers is key.
- Maintain a positive and respectful attitude.

Full-Time employment available with possibility of flexible hours. Paid bi-weekly with competitive wage or salary. Work truck and ATV, with all tools required to complete daily tasks, is provided. Must be willing to relocate and live in the immediate Huron/Perth County working area.
